THE DURASTRIP RANGE FEATURES

The DURASTRIP range is truly comprehensive and able to meet any requirement, from small cost-conscious projects to sophisticated projects with significant quality demands.

The characteristics of each family are clearly specified on each page: on DURASTRIP comparison table you will find a table summarising

the data of the different models.

The entire range shares the following characteristics

Ra80 > Ra95

Very high colour rendering: indispensable in prestigious projects, environments with particular uses, museum installations...

CONSISTENCY AND PRECISION OF COLOUR

COLOUR PRECISION

High quality LED sources with the Bin centred on the Planck curve with a 2 to 5 MacAdam steps tolerance, depending on the model, on all production lots.

COLOUR CONSISTENCY

among the various lots in production and cancellation of colour shifting during useful life thanks to the low driving current, excellent thermal management and effective control of the production line.

COLOUR UNIFORMITY IP20 E IP68

DuraStrip IP68 are produced with extrusion technology: the high quality materials used make it possible to maintain the same light colour between IP20, IP65 and IP68!

DIMMABLE FROM 0 TO 100%

easy to control light with the most common dimming systems

- DALI
- DMX
- Domotics controls
- Push, DALI
- CASAMBI compatible

LIFETIME :
25.000H--> 60.000H

IP20 - IP65
IP67 - IP68

What do you need f
or your project?

The degree of protection can be se-
lected depending on the use. Nor-
mally used in indoor installations
IP20 strips can be sealed in profiles
which increases mechanical resi-
stance and simplifies maintenance.

Duralamp strips are CE, UL or
ETL certified, quality marks
recognised worldwide.

3 YEARS:
reliability and quality
for a variety of projects.

5 YEARS H24:
THE TOP OF THE RANGE,
perfect for the most demanding and im-
portant projects

CERTIFIED QUALITY

5 YEAR 24*H WARRANTY

LINEAR LIGHTING FOR YOUR PROJECTS

Standard SELECTION

The diagram illustrates the assembly of linear lighting systems. At the top, a DuraStrip LED strip and an aluminium profile are shown with a large plus sign between them. Two red arrows point down to the resulting product categories on the left and right.

Left Column (LED Products):

- DuraStrip white light**
DuraStrip human centric
DuraStrip colour
- Duraneonflex**
- DuraStrip hivolt**

Right Column (Aluminium Profiles):

- Surface profiles**
- Recessed profiles**
- Corner profiles**
- Decorative profiles**

ALUMINIUM PROFILES
the standard length of Duralamp profiles is 2 metres (except where otherwise specified). Each bar comes complete with fixing accessories (clips) and end caps.

Additional Product Details (Left Column):

- DURASTRIP:** packed in 5-metre rolls (except where otherwise specified) that can be cut to size on site with the cutting pitch indicated on each product.
- DURANEONFLEX:** packed in rolls of 5 or 10 metres depending on the model.
- Line voltage DURASTRIP HiVolt** is assembled internally with the length and wiring terminals as requested by the customer.

LINEAR LIGHTING FOR YOUR PROJECTS

Customised service at standard costs

Why is it worth using
the Customised Service?

Because it reduces installation
time and costs

Because it allows greater
precision

Because the product is assembled,
tested and guaranteed by Duralamp

What can we 'tailor' to the needs of your project?

Light lines of any range, cut to the desired size, with
the required length and IP rated wiring.

Profiles cut to size, complete with mounting
accessories.

Assembly of strips and profiles cut to size, complete
with assembly accessories and/or with special
processing (resin coating etc.).

Light 'cut to measure'.
Duralamp's expertise on the creation of specific
light spectrums enables the study and realisation
of special, innovative and stunning light tones that
enhance large projects.

CUSTOM CUTS

The basic elements to be considered when structuring a cut-to-size request are the same as those needed to realise a project:

1

Strip Selection

Type of strip, light colour and power required.

2

The Cutting Pitch

The cutting pitch of the selected strip (i.e. the minimum cut of the strip, indicated on all strips). In the event that the selected strip does not allow the desired length to be achieved exactly, it is important to decide whether the cut is to be made in excess or short of the expected length.

REQUIRED SIZE 1157MM

cutting pitch
of this strip
50mm

final cut of
1150mm
or 1200mm

3

Types and length of terminals

The size of the closing and/or power terminals when needed (e.g. mains voltage strips have large terminals, see DuraStrip HiVolt pages).

Dimensions of 24V strip terminals (indicative)

4

The Total length associated with the resulting power

Remember that the maximum length per power supply is equal to the length of the reel: 4m, 5m, 10m, 20m, 50m etc. depending on the model.

See the table on driver connections on page 493 (of UNICO Catalogue) "Connection modes".

These **4 pieces of information** allow you to make an accurate design or request customised machining.

PERSONALISED SERVICE

READY TO INSTALL

A personalised service is provided for all light ranges and profiles in this catalogue. Every process entails a fixed price that must be added to the cost per metre of the strips or profiles to be cut to size. Also consider the possibility to insert strips in profiles:

	Cutting DURASTRIP HiVOLT to size* (includes a 150 cm cable):
VA00	fixed cost of piece work
	Cutting DURASTRIP to size* (includes a 20 cm cable):
VA01	fixed cost of piece work
	Cutting DuraNeonFlex to size* (includes a 30 cm cable):
VA02	fixed cost of piece work
	Cutting profiles to size (includes mounting accessories) :
	Cutting DuraNeonFlex to size (no terminal)*:
VA03	fixed cost of piece work
	Cutting Custom profiles to size (includes mounting accessories):
VA04	fixed cost of piece work
	Assembly of strips onto profiles:
VA05	fixed cost of piece work
EXAMPLE:	Assembly of strips onto profiles:
VA01	fixed cost of cutting the strip
VA03	fixed cost of cutting standard profile
VA05	fixed cost of assembling the strip +profile (for every strip)

* DuraStrip and DuraNeonFlex must be cut by respecting the cutting pitch distances for each type.

Other particular processes such as resins, cables of specific lengths etc, must be agreed with the sales force on a project basis. The personalised service is subject to a minimum order: your local sales contact or our headquarters in Florence will evaluate the options available with you depending on the size of the project and required production time.

TM30

The Colour Rendering Index Ra or CRI, is a dimensionless index that ranges from 0 to 100 and partially describes the capacity of a light source to faithfully render the colour of a consistently lit object in line with what a reference source would do. It is based on the adherence of a source to the light emitted by a tungsten filament evaluated on a panel of 14 colour samples, of which only the first 8 are taken into consideration, none with saturated hues.

The TM-30 30 index allows for a more complete reading on the way a source is able to render colour. It introduces the concept of saturation, uses a balanced mixture of incandescent lamps and sunlight as a reference and extends colour samples to 99 subdivided into 7 reference areas with colours from nature for example flowers and leaves, skin tones, colours of paintings, textiles, plastics, printed material and 14 CRI colour samples.

CRI COLOUR RANGE

TM-30 COLOUR RANGE

The additional information that TM30 can give is provided by two graphs that summarise the values relating to Rf, Rg and Hue Shift (a shift in the colour hue, or the perception of a false colour compared to what we would see in sunlight), and the second how the source works for groups of materials (99CES) for immediate understanding:

The “rendering” of the source is expressed with a series of explanatory graphics of the colorimetric and qualitative characteristics and 2 distinct indexes.

The fidelity index Rf, which describes the ability of the source to render colours.

It varies on a scale of 0 to 100 where 100 is perfect adherence. It is also possible to have Rf targeted on one of the seven reference areas. For example “Rf skin” refers to the ability of the source to express the colours relating to the reference area concerning skin tone. It is similar to Ra but can be lower given that the reference colours range from 14 to 99.

TM30

The Gamut index R_g , which expresses the saturation level of the colours lit by the source. It varies on a scale from 60 to 140. Values lower than 100 indicate a decrease in saturation, higher values indicate an increase in saturation therefore more vivid colours. Colours will be more or less saturated depending on whether they are inside or outside the reference circle.

The last in-depth graph is the detail of the deviation and rendering of semitones compared to the reference source that is represented by the following diagram:

DESATURATED

HYPER-SATURATED

DURASTRIP COB

DURASTRIP COB

FEATURES

The construction structure of COB strips allows the LEDs to be applied on the substrate in a continuous manner, optimizing all the space: the result is a continuous line of light, emphasized by the phosphate cover.

The type of LEDs used emit less heat than the CHiPs normally used for strips, allowing very high efficiency and strong brightness even at low wattages.

INSTALLATION

Complete with double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

USAGE INFORMATION

Dimmable 0-100% Flicker Free

DALI - DMX - 1-10

Analogue and digital domotic control systems

Push Dali with ZKCDAFF controllers

CASAMBI compatible

PACKAGING

Packaged in 5 meters reels.

LED

320 LED/m

Ra>90

Lifetime: 25,000h

Warranty: 3 years

CONNECTIONS

IP20: terminals with free wires.

Maximum connection length 5 m. Max 4A.

Strips can be cut to size by following the cutting indications printed on the strips.

CUSTOM PRODUCTIONS

See details at the beginning of Linear Systems

Cutting DuraStrip to size*:

Fixed cost of piece work

* Respect the cutting pitch. Supplied with 15 cm cable.

DURASTRIP SELECT

DURASTRIP SELECT 140

DURASTRIP SELECT were designed to satisfy the range of use that requires an excellent product as well as cost optimization.

The SELECT range is produced with a single circuit substrate, a leaner production that takes advantage of production progress to obtain efficient strips with excellent light emission and colour control over time.

Available in an IP20 and IP65 version.

INSTALLATION

The 25W and 60W strips can be installed directly on the application surface using the included double-sided 3M adhesive or bridges: we recommend the using aluminium profiles only with the 96W strips, in order to optimize heat dissipation.

When using double-sided tape degrease the application surface adequately.

USAGE INFORMATION

Dimmable 0-100% Flicker Free

DALI - DMX - 1-10

Analogue and digital domotic control systems

Push Dali with ZKCDAFF controllers

CASAMBI compatible

POWER SUPPLY

Max current for single power supply: 4A.

PACKAGING

Packaged in 5 meters reels.

The 24W/m=96W strip is packaged in a 4 m reel.

LED

LED 2835

140 LED/m

CONNECTIONS

IP20: terminals with free wires.

IP65: complete with a 15 cm long IP65 M/F cable on 2 sides.

For longer connections, connect in series or parallel.

Strips can be cut to size by following the cutting indications printed on the strips.

For IP65 strips, restore the IP protection after cutting.

CUSTOM PRODUCTIONS

See details at the beginning of Linear Systems

Cutting DuraStrip to size*:

Fixed cost of piece work

* Respect the cutting pitch. Supplied with 15 cm cable.

DURASTRIP

DURASTRIP PRO IP20

DURASTRIP PRO uses “copper shielded” technology (complete copper coating on the circuit on both sides of the support) designed by our Research and Development Laboratory: the increased quantity of copper improves thermal management and ensures a longer life.

DURASTRIP PRO are produced with a dual circuit substrate: the power distributed to every circuit is less, the temperature is halved and the risk of power failures is eliminated. Using LED 3528 limits the colour shifting effect on the beam emission angles.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface and jumpers to be screwed to the surface. When using double-sided tape degrease the application surface adequately.

USAGE INFORMATION

Dimmable 0-100% Flicker Free
DALI - DMX - 1-10
Analogue and digital domotic control systems
Push Dali with ZKCAFF controllers

DURASTRIP PRO IP68

DURASTRIP PRO uses "copper shielded" technology (complete copper coating on the circuit on both sides of the support) designed by our Research and Development Laboratory: the increased quantity of copper improves thermal management and ensures a longer life.

DURASTRIP PRO are produced with a dual circuit substrate: the power distributed to every circuit is less, the temperature is halved and the risk of power failures is eliminated.

LED density constant on all powers: minimising the "dot" effect even with a grazing light.

Using LED 3528 limits the colour shifting effect on the beam emission angles.

Thanks to the new extrusion technology the colour temperature of DURASTRIP PRO IP68 is EXACTLY the same as DURASTRIP PRO IP20.

A big advantage that makes it possible to use strips with different IP ratings in adjacent surroundings with the certainty of maintaining a constant light colour and the required effect.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface and jumpers to be screwed to the surface.

When using double-sided tape degrease the application surface adequately.

USAGE INFORMATION

Dimmable 0-100% Flicker Free

DALI - DMX - 1-10

Analogue and digital domotic control systems

Push Dali with ZKCDAFF controllers

CASAMBI compatible

PACKAGING

Packaged in 5 meters reels.

LED

LED 3528

128 LED/m - 240 LED/m

Ra>95

Lifetime: >60,000h

Warranty: 5 years

COLOUR OF THE LIGHT

Choice of white colour temperatures.

BINNING

ANSI/SDCM: 2 step.

CONNECTIONS

Complete with a 15 cm long IP65/68 M/F cable on 2 sides.

Maximum connection length 5 m. Max 4A.

For longer connections, connect in series or parallel, see diagram.

Strips can be cut to size by following the cutting indications printed on the strips.

For IP65/IP68 strips, restore the IP protection after cutting.

CUSTOM PRODUCTIONS

See details at the beginning of Linear Systems

Cutting DuraStrip to size*:

Fixed cost of piece work

* Respect the cutting pitch. Supplied with 15 cm cable.

* Ra80 Single circuit: L70 = 30.000h. Warranty 3 years.

(1) We recommend using it with aluminium profiles to optimise heat dissipation. Item with free wires (without connector).

ADDITIONAL CUT AND MOUNT KIT FOR STRIP IP68

	ART.
Additional cut and mount kit for Strip IP68	1 / 1
	KT68PA

Additional cut and mount kit for Strip IP68 and IP65.

This kit includes 4 terminal blocks with 15 cm wire, 10 silicone fixing bridges with screws.

DURASTRIP

DURASTRIP PRO240 IP20

PRO240 is a range of strips with significant power, up to 24W/m. With an efficiency of 110lm/W and thanks to a narrow space between the LED sources, PRO240 is the strip to use when strong light emission is required, for example for installations at great heights.

At the same time it guarantees extreme uniformity and colour reliability, made superlative by Ra>95.

PRO240 are new generation strips which are increasingly efficient and reliable over time.

Available in an IP20 and IP65 version.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface and jumpers to be screwed to the surface.

When using double-sided tape degrease the application surface adequately.

Always use with aluminium profiles for heat dissipation.

DURASTRIP

DURASTRIP PRO EVO IP68

The PRO EVO line is characterized by the narrow pitch of the LEDs even on the smaller power 5W/m: a quality product with 140lm/W efficiency.

Excellent colour rendering, Ra92, and a choice of 4 different wattages, from 5W per metre to 22W per metre.

It can be used in any project and provides excellent energy savings in residential or commercial contexts.

FEATURES

White shades: 3000K and 4000K available, other colour temperatures on request and with MOQ.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface and jumpers to be screwed to the surface.

When using double-sided tape degrease the application surface adequately.

USAGE INFORMATION

Dimmable 0-100% Flicker Free

DURASTRIP

DURASTRIP TRIPLES

TRIPLES are strips that are closest to LED plates with the added advantage of flexibility, they are easy to cut in the field at intervals of 5 cm and easy to install.

With a width of 25 mm and careful positioning of the LED sources they ensure a broad luminous surface and considerable power output: 5000 lumen per metre for warm light.

TRIPLES are installed in profiles with wide diffusion for example in suspension profiles.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

Always use with aluminium profiles for heat dissipation.

USAGE INFORMATION

Dimmable 0-100% Flicker Free

DURASTRIP

DURASTRIP EXTRA NARROW IP20

The EXTRA NARROW series is a concentrate of quality materials that is shared with other DURASTRIP: high quality choices to ensure a professional level performance, excellent heat dissipation and long duration, Ra >90.

EXTRA NARROW is the range with the smallest substrate in the entire collection.

Just 5 mm or 6 mm wide, it solves all needs not only connected to confined spaces but above all, for characteristic lighting design.

The type of LED source used and the short LED's center to center distance eliminate the dot effect also in profiles with lenses that are very close to the base.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

DURASTRIP

DURASTRIP BIDIRECTIONAL

Two-way DURASTRIP are made by mounting the LED sources on the substrate in two orthogonal lines: this creates an asymmetric emission of around 220°.

The previous final result could only be obtained by using two strips and a particular arrangement.

Two-way DURASTRIP are a functional optimization and therefore perfect for projects that focus on using decorative profiles or where a wall washer effect is required.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

DURASTRIP

DURASTRIP S BEND

Owing to the particular qualities of the substrate, DURASTRIP S BEND allows tight corners to be created while maintaining the uniformity of light.

It is Ideal for following and emphasising the most imaginative forms of modern architecture along with providing creative lighting solutions for many other applications where a minimal installation radius is desired.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface.
When using double-sided tape degrease the application surface adequately.

DURASTRIP

DURASTRIP EXTRALONG 24V IP20

EXTRALONG 24V produced in 20 metre reels allow for installations of great lengths, up to a max of 20m also with chain segments connection, without extra power supplies.

With two strips (not connected) and two drivers at opposite ends, light lines of up to 40 metres can be achieved!

EXTRALONG 24V solve problems in situations that require indirect lighting (cove lighting) or outdoors where numerous power supplies cannot be stored or where there are limitations for cables to pass. EXTRALONG 24V have all the same quality components and construction method as all other strips in the range to obtain real lighting uniformity over the entire length of the strips.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

DURASTRIP

DURASTRIP EXTRALONG 48V IP20

EXTRALONG 48V produced in 50 metre reels allow for installations of great lengths, up to a max of 50m also with chain segments connection, without extra power supplies.

With two strips (not connected) and two drivers at opposite ends, light lines of up to 100 metres can be achieved!

EXTRALONG 48V have all the same quality components and construction method as all other strips in the range to obtain real lighting uniformity over the entire length of the strips.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

PACKAGING

Packaged in 50 meters reels.

LED

LED 2835SMD

84 LED/m

Ra>90

Lifetime: >50,000h

Warranty: 5 years

COLOUR OF THE LIGHT

Choice of white colour temperatures.

BINNING

ANSI/SDCM: 2 step.

CONNECTIONS

Terminals with free wires.

Maximum connection length 50 m.

Strips can be cut to size by following the cutting indications printed on the strips.

CUSTOM PRODUCTIONS

See details at the beginning of Linear Systems

DURASTRIP

DURASTRIP WALL WASHER

A minimal and unobtrusive light element providing a wall wash effect.

By utilising an asymmetric reflector, the light is directed across the vertical surface, the efficiency of the LED's power is maximised to provide a uniform wash effect of light.

The product is sealed to guarantee a high degree of Ingress Protection (IP67).

INSTALLATION

Installation requires metal clips, see separate accessories code.

DURASTRIP

DURASTRIP GRAZER

As a result of each individual LED being fitted with a 30° aperture, DURASTRIP GRAZER will create a distinguished radiance effect. The grazing properties will highlight a relief on a building's facade, the material essence of modern wallpaper or the refined imperfections of an architectural wall.

The narrow angle of GRAZER requires the installation to be positioned slightly offset from the wall enhancing the three-dimensional aspect of the illuminated vertical surface.

INSTALLATION

Installation requires metal clips, see separate accessories code.

DURASTRIP

DURASTRIP FULL SPECTRUM IP20

DURASTRIP FULL SPECTRUM means that the white colour of this strip is created by a spectrum that includes all of the colours. Colour rendering is excellent, $Ra > 95$ but DURASTRIP FULL SPECTRUM goes far beyond this figure.

The FULL SPECTRUM is able to reproduce the colours in the environment, returning the vividness of the objects as if they are lit by the sun, in all colour temperatures.

To show more clearly and immediately the performance of these strips from the colour rendering point of view, we have provided the values indicated by the TM-30.

DURASTRIP FULL SPECTRUM is indispensable in environments where the point of colour is very important: art galleries, museums, fabric shops, etc.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

DURASTRIP

DURASTRIP TUNABLE CCT

The colour of the light and emission intensity have a profound influence on people's emotional state, according to Human Centric Lighting principles.

Therefore, using tools like the DURASTRIP CCT is fundamental as they allow dynamic light management to improve the environment and the feelings of the people who find themselves there, to promote well-being and improve performance.

Dynamic light is essential in environments where people remain for a long period of time, such as offices, schools, etc., its use is equally useful to create different atmospheres in the same environment: it allows you to illuminate a restaurant with a vibrant white light at lunch and a softly relaxing light at dinner!

DuraStrip CCT offers two white colour temperature variation options: from 1800K to 3500K or from 2700K to 6500K.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

DURASTRIP

DURASTRIP DIM-TO-WARM IP20

DURASTRIP DIM-TO-WARM allows the light intensity to be decreased and the colour temperature of the light to be varied at the same time.

By simulating the dimming curve of old incandescent lamps, it ensures the right light for different times of the day and for different activities in the environment, according to the Human Centric Lighting principle.

The single channel dimming technology works on a single chip, "heating" the colour of the light and thus creating a comfortable atmosphere and a natural feeling to the light, to put the user at the centre of the lighting experience.

The 1800-3000K version is particularly desired for installations into hospitality atmospheres, restaurants, etc.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

USAGE INFORMATION

This kit includes 4 terminal blocks with 15 cm wire, 10 silicone fixing bridges with screws.

DURASTRIP

DURASTRIP EXTREME TUNABLE CCT IP20

This strip adds to the characteristics of the CCT, which varies the white from 3000K to 6500K, and the potential offered by an LED that encloses the Red Green and Blue spectra + a very warm amber colour (wonderful for the "ancient stone" effect).

DURASTRIP Extreme Tuneable gives the designer the freedom to choose previously unthinkable shades of light without using complex electronic equipment and create the most diverse and new, pleasant and amazing lighting scenes using just one strip.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

Always use with aluminium profiles for heat dissipation.

DURASTRIP

DURASTRIP EXTREME TUNABLE CCT IP65

Why Extreme Tunable?

This strip adds to the characteristics of the CCT, which varies the white from 3000K to 6500K, and the potential offered by an LED that encloses the Red Green and Blue spectra + a very warm amber colour (wonderful for the "ancient stone" effect).

DURASTRIP Extreme Tuneable gives the designer the freedom to choose previously unthinkable shades of light without using complex electronic equipment and create the most diverse and new, pleasant and amazing lighting scenes using just one strip.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

Always use with aluminium profiles for heat dissipation.

USAGE INFORMATION

NOTE: 6 channels needed

Dimmable 0-100% Flicker Free

This kit includes 4 terminal blocks with 15 cm wire, 10 pcs end caps, 10 pcs silicone fixing bridges with screws.

DURASTRIP

DURASTRIP RGB + WHITE IP20

RGBW DURASTRIP, RGB colours along with a shade of warm white.

Introducing a white spectrum the saturated RGB tones are "intensified" and the nuances that can be obtained increase: at the same time white can be enriched with RGB colours to obtain surprising pastel tones.

RGBW offer the possibility to obtains a "real" white in the indicated tone, 2700K or 3000K and not a white obtained by overlapping red-green-blue, i.e. the one produced by RGB strips.

White emission from the LED quad is more efficient than coloured LED sources which means RGBW strips are more high performance and suitable for professional uses.

They can be interfaced with special 4 channel controllers, Code ZKCDMXW to obtain all required tones in a continuous way.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface and jumpers to be screwed to the surface.

When using double-sided tape degrease the application surface adequately.

▼ To be discontinued.

DURASTRIP

DURASTRIP EXTRA NARROW RGB

The EXTRA NARROW series is a concentrate of quality materials that they share with other DURASTRIP: high quality choices to ensure a professional level performance, excellent heat dissipation and long duration.

EXTRA NARROW is the range with the smallest substrate in the entire collection. Just 5 mm wide - 6 mm for the RGB version- it solves all needs not only connected to confined spaces but above all for particularly light and characteristic "light designs", even when using the infinite range of RGB colours.

The type of LED source used and the short LEDS' center to center distance eliminate the dot effect also in profiles with lenses that are very close to the base.

INSTALLATION

Complete with 3M double-sided tape to attach to the surface. When using double-sided tape degrease the application surface adequately.

DURANEONFLEX

The DuraNeonFlex collection is the best tool for following the fluid shapes of contemporary architecture or creative lighting, obtaining unprecedented effects: a light strip that can be twisted up to 360° in one meter! DuraNeonFlex are made from high-quality materials and offer a choice of three types of connection: in-line, side or rear.

Here below the various options of the DuraNeonFlex collection:

DURANEONFLEX

DuraNeonFlex is an extruded flexible silicone profile, complete of with a 120 LEDs per metre strip.

DURANEONFLEX-Q

DURANEONFLEX-Q
This is the rectangular section proposal: both models include Top and VERT versions, for bending radii of up to 12 cm!

DURANEONFLEX TWIST

DuraNeonFlex Twist è lo strumento ottimale per seguire le forme fluide dell'architettura contemporanea, in grado di seguire percorsi curvilinei.

DURANEONFLEX MINI

Una linea di luce molto sottile (8mm), senza puntinatura, senza limitazioni di taglio, flessibile fino a poter creare curve di 30mm e con la disponibilità di 8 colori oltre alla luce bianca.

DURANEONFLEX

Duraneonflex (in short DNF) is configured in the following 2 methods both with a minimum quantity to be confirmed with the sales force:

1

DURANEONFLEX

without terminals

Provided by meters, max length 10 m according to model (professional use 50 mt reel also available); cut every 5 cm. They can be field cut as the cutting point is clearly indicated. Terminals and other accessories must be ordered with their separate codes.

DNF Strips with end cap are IP40; if properly sealed with glue they provide IP65.

SUPPLIED ALREADY CUT AT REQUESTED MEASURES

FOR OUTDOOR AND INDOOR USE, CUT AT REQUESTED MEASURES

2

DURANEONFLEX

complete with terminal: A - B/D - C

Factory prepared DNF are complete with the chosen terminal and end cap. The power cord with plug for driver connection is INCLUDED into the package. Provided in meters, max length 10 m; cut every 5 cm.

Factory prepped DNF Strips are IP65.

Code composition

The list of principal codes for DuraNeonFlex TOP and VERT can be found on the following pages.

DNF strips without terminals are available both in 10 m standard reels (50 m professional reel also available) or with custom cut size.

Maximum length per single power supply: 10 m.

The required length for your custom cut is to be added at the end of the code using 4 digits for the size in cm. Max length is 10 m.

Only strip: accessories to be added

Strip complete with connector, power cord and end cap

FLEXIBILITY, RELIABILITY, SAFETY.

But also light quality and light colour stability over time.

And the possibility of creating long lines of light, excellent colour rendering, etc.

DURASTRIP and DuraNeonFlex range: loved by lighting designers all over the world!

MOUNTING, CABLING AND CONNECTION SOLUTIONS

Terminal wiring

Jumper for strips connection

Jumper for 'in line'* cabling connections

Jumper for 'lateral'* cabling connections

Jumper for 'rear'* cabling connections

Surface mounting

Transparent 'omega shape' clips

Aluminum channel

Recessed mounting

PC clip for DNF anchoring

Flexible metal profile

DuraNeonFlex

DURANEONFLEX TOP

DuraNeonFlex is a flexible extruded silicone profile, complete with 120 LEDs per meter strip.

The narrow pitch of the chips and Integrated Circuit technology make DNF a perfect light line, homogenous on all its 10 meters of length.

TPOLOGY

DuraNeonFlex features a rounded section.

TOP flex Version: the light is emitted on the upper side of the light channel.

FEATURES

Flexible light line with continuous lighting: so flexible you can create curves with a minimum diameter of 12 cm for VERT models.

Anti-glare diffuser function.

Maximum length per single power supply: 10 metres.

INSTALLATION

It is attached to the surface with the clips; it can be cut following the cutting marks (5cm).

DNF is equipped with different terminals for power supply: in-line, side and rear connection to the profile to meet any installation requirement.

MATERIAL

Extremely flexible, impact resistant and weatherproof extruded silicone.

USAGE INFORMATION

DuraNeonFlex are dimmable like all DURASTRIP.

PACKAGING

DNF can be supplied at any specific length (max length 10 meters for single power supply, cut every 5 cm) with or without the electrical terminals or in 10 m and 50 m reels without terminals.

DNF VERT

DuraNeonFlex

DURANEONFLEX VERT

DuraNeonFlex is a flexible extruded silicone profile, complete with 120 LEDs per meter strip.

The narrow pitch of the chips and Ic technology make DNF a perfect light line, homogenous on all its 10 meters of length.

TPOLOGY

DuraNeonFlex features a rounded section.

VERT flex Version: vertical emission away from the bottom of the channel.

FEATURES

Flexible light line with continuous lighting: so flexible you can create curves with a minimum diameter of 12 cm for VERT models.

Anti-glare diffuser function.

Maximum length per single power supply: 10 metres.

INSTALLATION

It is attached to the surface with the clips; it can be cut following the cutting marks (5cm).

DNF is equipped with different terminals for power supply: in-line, side and rear connection to the profile to meet any installation requirement.

MATERIAL

Extremely flexible, impact resistant and weatherproof extruded silicone.

USAGE INFORMATION

DuraNeonFlex are dimmable like all DURASTRIP.

PACKAGING

DNF can be supplied at any specific length (max length 10 meters for single power supply, cut every 5 cm) with or without the electrical terminals or in 10 m and 50 m reels without terminals.

CUSTOM PRODUCTIONS

See details at the beginning of Linear Systems

INSTALLATION AND ASSEMBLY DETAILS

DNF are extremely flexible strips but it is important not to force the curvature beyond the specified limits. Installations that do not comply with these instructions cannot be covered by warranty. Take care not to twist the product during installation.

DNF-Q / TOP

DNF-Q / VERT

Connector insertion details

Discovering welding points: First, identify the terminal part that will lead to the power feeder. Peel off the silicone above the bottom layer of PCB, to bare the solder pads. Please work with care, do not scratch or damage the PCB layout, otherwise the fixture will not work!

Insert power cable into the chosen terminal cap. Make sure the end cap is the correct power feeder method as required. Move and adjust the end cap to the right location for appropriate soldering process.

Make sure of the correct polarity, to avoid non-working for the luminary. Good soldering quality should be made in full and firm solder point without cold solder joint. Same process for the RGB colour luminary. Seal with silicone glue.

Apply the glue to the right parts around the terminal as the diagram. Push and fix the endcap onto the terminal, then get rid of residual glue. After 10 minutes the glue's surface can be cured and hard, after 24 hours the glue can be cured completely and achieve the strongest adhesive capacity. The strip should rest flat while the glue is being cured, do not pull or push the end cap. Same process for the end cap.

DURANEONFLEX TWIST

DuraNeonFlex Twist is the ideal tool to follow the fluid form of contemporary architecture and is able to follow curved paths that change direction in unexpected and surprising ways, DNF Twist can be twisted both vertically and horizontally and may be cut to size at any point making it possible to obtain the exact lengths necessary for any project.

FEATURES

Flexible light line with continuous lighting: so flexible you can create curves with a minimum diameter of 6 cm and allows twisting of 360° in one meter!

Lifetime: internal use >50,000h; external use>35,000h

Warranty: 3 years

IP65 with free wires

INSTALLATION

DNF is equipped with different terminals for power supply: in-line, side and rear connection to the profile to meet any installation requirement.

MATERIAL

Extremely flexible, impact resistant and weatherproof extruded silicone.

USAGE INFORMATION

Dimmable 0-100%

DALI - DMX

Analogue and digital domotic control systems

DuraNeonFlex

DURANEONFLEX MINI

A very slim line of light (8 mm) with no LED dotting, without cut limitations, flexible enough to be able to create 60 mm curves and available in 8 colours besides white light: DNF MINI is a small part of an amazing family!

Entirely extruded in high transmittance silicone, weather proof and impact resistant, it is suitable for creating particularly detailed and attractive light patterns, even in a single connection of 10 meters. The closing terminals are in a translucent silicone allowing the light to pass through to be the same colour as the strip.

TPOLOGY

Flexible light lines in extruded silicone, 8 mm thick with uniform and balanced VERT light emission and no LED dotting.

FEATURES

Flexible light line with a continuous lighting effect: so flexible you can create curves with a minimum diameter of 3 cm and allows twisting of 360° in 30 cm!

24VDC

Ra>80

Lifetime: internal use >50,000h; external use>35,000h

Warranty: 3 years

INSTALLATION

Surface mounted with clips; can be cut at any point (free cut). Fitted with different outputs for power supply.

MATERIAL

Extremely flexible, impact resistant and weatherproof extruded silicone.

USAGE INFORMATION

Dimmable 0-100%

DALI - DMX

Analogue and digital domotic control systems

Push Dali with ZKCDAFF controllers

CASAMBI compatible

PACKAGING

Packaged in 10 meters reels.

DNF MINI can be ordered in custom lengths, with a max of 5 meters per electrical connection - with no minimum cut size - without or without the terminals needed for the project (in-line, side, or rear connection).

CUSTOM PRODUCTIONS

See details at the beginning of Linear Systems

DURASTRIP HIGH VOLT

DURASTRIP HiVOLT for direct mains connection provides the advantage of being able to reach a length of 50 metres with power directly from mains electrical supply whilst offering lighting uniformity and colour along the entire length of the strip. Without the inconvenience of a remote LED driver, the strips can be used in surface mounted installations. With a shuko plug the product is IP44 but supplied already cut to the required length with a free wire arrangement, it is possible to achieve an IP65 protection provided the cables are terminated into a suitably rated enclosure making DURASTRIP HiVolt easy to maintain and resist the most common aggressive environments.

**Supplied already cut at

CONFIGURATION OF THE "CUSTOM MADE" PRODUCT

Here are the necessary specifications to define the "custom made" HIVOLT DURASTRIP, complete with cable and plug or with free wires.

The following elements must be defined:

1

Existing product code

2

Length of strip segment

The requested length must take into account the cutting spacing of 20 cm, max 50m single feed.

(ALWAYS CONSIDER THE 20 CM CUTTING SPACE)

If a strip complete with a plug is requested, consider the size of the accessories: see the technical drawing to be sure

FREE WIRES

VA00

DURASTRIP HiVolt

DURASTRIP HIVOLT

DURASTRIP HiVolt differs from similar products due to its extreme sturdiness: the protective sheath is reinforced by a double extrusion layer which provides a solid and highly resistant compacted quality. DURASTRIP HiVOLT for direct mains connection provides the advantage of being able to reach a length of 50 metres with power directly from mains electrical supply whilst offering lighting uniformity and colour along the entire length of the strip. Supplied already cut and wired to the required size. Equipped with a Shuko plug for direct connection to the network, it has an IP44 degree of protection that makes it easy to maintain and resistant to the most common wearing agents.

INSTALLATION

We recommend to order the assembly clips considering to use 4 clips for every metre. Any particular requests will be specified in the project form.

USAGE INFORMATION

Dimmable with DMX dimmer code ZKCDMX-HV.

ACCESSORIES

Fixing bridges.

PACKAGING

Supplied already cut to measures.

VA04

* Includes mounting accessories.

Strip **PROFILES**

Alluminum Profiles

ALUMINIUM 6063 = Aluminium-Magnesium-Silicon alloy ideal for even complex profile extrusion given its exceptional mechanical characteristics.

The excellent degree of finish is coupled with high resistance to atmospheric corrosion and good resistance to marine corrosion.

Density: 2.70 kg/dm³

Melting temperature: 600 °C

Thermal conductivity at 20 °C: 1,72W/cm°K

Absence of longitudinal torsion on the profile
Perfect mechanical quality on the length

Screens

PC= White polycarbonate. Used to cover all profiles that do not need to have any particular resistance to crushing.

Consider a reduction on light emission of the strip of 10%.

Accessories

Usually the end caps are supplied in pairs, one with a hole to allow the cable to pass through and one with a closed end. Unless otherwise indicated. In every pack there are a pair of end caps for every metre of profile: a 2 m profile will have 2 sets of end caps and 2 sets of clips (if they are part of the product); a 3 m profile will have 3 sets of end caps and 3 sets of accessories.

Cutting profiles to size*:

fixed cost of piece work

VA04

* Includes mounting accessories.

Profiles and LED strips

When choosing the profile and the strip that will be housed in it, consider whether the internal width and shape of the profile allow for the insertion of the strip including the terminals.

When using IP65/68 strips, the terminals will therefore remain outside the narrower profiles.

IP20, 65 or 68?

All profiles have an IP20 rating.

The simple end cap closing mechanism does not make it possible to achieve higher IP protection unless the strip positioned inside is itself protected from dust and water.

If the ends of the profiles are resinated and the strip is equipped with sufficient cabling then the profile can be used as IP65 (protected from low pressure water jets) or IP67 (protected from brief immersion in water).

IP68: factory custom made

In the event of significantly sized projects it is possible to request the profiles are sealed to obtain IP68.

All strips selected will be connected with a cable equipped with an IP68 jack and all profiles of the requested size will be sealed to obtain IP68 protection.

Surface profiles

SURFACE PROFILES: PRAP-U

FEATURES

Aluminium profile for surface installation.
It houses both IP20 and IP68 strips up to 18 mm in width.
Equipped with a compartment to accommodate cables.

CAN BE USED WITH LED STRIPS WITH MAXIMUM WIDTH:
18 mm

INSTALLATION

Surface installation with its fixing clips.

MATERIAL

6063 Aluminium profile with a white PC screen.

ACCESSORIES

Every 2 metre bar is complete with 1 set of end caps (with and without holes) and 1 set of mounting clips.
Spare accessories available with a separate code.
Screens with different beam openings, spot, flood and asymmetrical available to replace the standard screen the profile is equipped with.

PACKAGING

Supplied in packages of 5 bars, each one measuring 2 meters complete with screen and accessories.

Decorative profiles

DECORATIVE SUSPENSION PROFILES: P01L

FEATURES

Aluminium profile for suspension installation.

Diffuser flush with the profile.

The dimensions of the profile, 4,6 x 5 cm, mean that this profile can be installed anywhere and responds to many needs using the same aesthetic element.

CAN BE USED WITH LED STRIPS WITH MAXIMUM WIDTH:

35 mm

MAXIMUM POWER:

40W/m

INSTALLATION

Suspension installation.

The profile housing allows for some drivers to be inserted: always check dimensions and electrical loads.

MATERIAL

6063 aluminium profile with white PMMA screen.

ACCESSORIES

Every 2 metre bar is complete with 2 sets of end caps (with and without hole) and 2 sets of suspension cables.

PACKAGING

Supplied in packaging of 1 bars of 2 meters complete with screen and accessories.

Spare accessories for additional cutting available with a separate code.

NOTES

Thanks to the possibility of using different strips the profile becomes a fixture that can provide different light temperatures, to be used depending on the activities carried out in that space at different times during the day.

1. Applicability

1.1 These general conditions (hereafter the "Conditions") constitute an integral and essential part of the contract of sale between the Parties. The Conditions shall regulate all legal relationships between Dura Lamp Srl (hereafter "Dura Lamp") and the purchaser (hereafter the "Purchaser") where the said relationships are not disciplined by the applicable terms of the Italian Civil Code (C.C.). The nullity of any of the terms of these Conditions shall not prejudice the validity of the remaining Conditions or the Contract.

1.2 Any changes to these Conditions shall be agreed between the Parties in writing, with the exception of the provisions set down in article 1341 of the Italian C.C..

2. Sales

2.1 Sale requests for the products (hereafter the "Products") shall be accepted 'subject to the seller's approval' and shall be considered to be irrevocable in accordance with and as an effect of article 1329 of the C.C. for a period of 1 (one) month from the date of the order requesting execution without prior acknowledgement, pursuant to and as an effect of article 1327 of the C.C. from the date on which the order is received by Dura Lamp.

2.2 The Products detailed in the individual orders and the relevant accessories shall be supplied to the Purchaser by Dura Lamp with "Retention of Title" pursuant to and as an effect of articles 1523-1526 of the Italian C.C. In this case, the transfer of ownership of the Products to the Purchaser shall take place exclusively upon the full payment of the price agreed, whilst any risks shall be the responsibility of the Purchaser from the moment of delivery of the Products.

2.3 Whilst confirming the terms stated above, the Parties hereby agree that should the Products and relevant accessories be destroyed for causes not attributable to Dura Lamp, the Purchaser shall not be released from the obligation to pay for the same, even where the Products have not yet been delivered.

3. Prices

3.1 The prices detailed on the price list shall be applied to Product sales orders. The aforementioned prices shall be unit prices per single item, except where stated otherwise for certain Products. The Parties shall have the right to agree, in writing, any derogations and/or special conditions of sale.

3.2 Moreover, the Parties hereby agree that the following conditions shall be applied:

- (I) Minimum order: € 300 (three hundred) for Italy - € 750 (seven hundred and fifty) for other countries;
- (II) Delivery free to destination in Italy for orders of € 300 (three hundred) for Italy or more;
- (III) Ex-Works deliveries for other countries.

3.3 The prices given above do not include VAT and installation costs.

3.4 The prices provided in this catalogue shall be valid until a new price list is published.

4. Currency

All prices are given in Euros (exclusive of VAT). Invoices shall be drawn up in Euros.

5. Special requests

Products can be supplied to the Purchaser in non-standard colours and with special features. The relevant price, minimum quantities per order, methods and timing of deliveries shall be agreed in each individual case, in relation to the reference order.

6. Transport

6.1 Dura Lamp shall not be liable for any damage and/or losses which may occur during the transportation of the Products, unless the Products are delivered free at destination.

6.2 Dura Lamp shall have the right to establish the method of transportation to be used for the Products, unless the Parties have previously established a method of transport in writing.

6.3 Upon delivery, the Purchaser shall undertake to verify the condition of the products and shall make any complaints directly to the carrier and/or conduct any actions necessary in the event of loss, misplacement, removal or damage, or delays in transportation and/or the methods of delivery of the Products.

7. Complaints

7.1 In the event that the Products are found to have any faults and/or defects, the Purchaser shall undertake to notify Dura Lamp of the same in writing, by means of a registered letter, no later than 8 (eight) days following the discovery of the said faults and/or defects, at the risk of invalidating the obligations of the guarantee provided by Dura Lamp. In this case, the faulty Products, which should be reported within the terms established, should be returned to Dura Lamp, once the Purchaser has received specific permission to do so in writing.

7.2 In the event that the Purchaser's complaints are held to be valid, Dura Lamp, at its complete discretion, may make the necessary repairs and/or replace the Products, excluding the attribution of any further charges, obligations, indemnification or compensation to the same. The Products in question should be returned to the Dura Lamp Srl plant in Via Pratese 164, 50145, Firenze, Italy. In the event that, following an inspection by Dura Lamp, the Products returned by the Purchaser are not found to be faulty and/or defective, Dura Lamp shall return the Products to the Purchaser, charging the same an amount equal to 15% (fifteen percent) of the value of the said Products.

8. Delivery

8.1 The Parties hereby agree that the terms established for the delivery of the Products shall not be considered absolute or essential and that, in any case, each item shall be exclusively in favor of Dura Lamp, unless otherwise agreed in writing between the Parties.

8.2 In the event of delayed delivery, once 15 (fifteen) days have passed since the agreed date, the Purchaser may send Dura Lamp written warning to complete the delivery within a further term of no more than 15 (fifteen) days from receipt of the same. In the event that Dura Lamp has not completed the delivery within this further term the Purchaser may withdraw from the order with regard to the Products that have not yet been delivered. In this case the Purchaser shall only be obliged to pay Dura Lamp for the Products actually delivered, excluding the payment of any further indemnification and/or compensation to the Purchaser.

8.3 Dura Lamp shall not be responsible for any other breaches, including the failure to deliver or delayed delivery of the Products, caused by events outside its reasonable control such as, purely by way of an example and not limited to the same: the failure to deliver or delayed delivery of manufacturing materials by Dura Lamp's suppliers, equipment breakdowns, strikes and other trade union action, electricity blackouts, suspension of or difficulties with transportation.

9. Payment

9.1 The price due shall be paid by the Purchaser according to the conditions and modalities set down in the order and, in any case, by means of payments made exclusively to "DURA LAMP Srl".

9.2 Dura Lamp shall only recognize the validity of the payments when the same are made in compliance with the provisions of article 9.1 above. This means that amounts paid using any other method shall not be considered to be a payment in discharge of the Purchaser's obligations. The eventual acceptance by Dura Lamp of a bank draft or other trade bill shall only occur with the application of the proviso "under usual reserve".

9.3 In the event of delayed payment with respect to the terms agreed, the Parties hereby agree that bank interest shall be due to Dura Lamp at the current PRIME RATE increased by 3 points. interest shall be applied as of right, with no obligation for Dura Lamp to send the Purchaser a formal notice to pay.

9.4 Moreover, in the event of a delay in payment of more than 15 (fifteen) days, Dura Lamp shall have the right to terminate the order as of right pursuant to article 1456 C.C., sending written notification of the same, barring compensation for any damage.

9.5 In the event that the Parties have agreed upon a method of payment by instalments for the Products, the failure to pay several instalments or just one instalment exceeding one eighth of the overall price of the Products, shall result in the loss of the Purchaser's right to pay in instalments and shall give Dura Lamp the right to request the remaining balance of the price or, alternatively, at its own discretion, to terminate the contract with immediate return of the Products and the acquisition of the instalments paid, as indemnification, barring the right to compensation for any damage sustained.

10. Guarantee

10.1 The Products provided by Dura Lamp shall be guaranteed for a period of 12 (twelve) months from the date of delivery against any manufacturing or material defects and/or faults and against any breakdowns not attributable to the Purchaser. Dura Lamp's only obligation and the Purchaser's right with regard to claims related to the guarantee shall be limited, as decided by Dura Lamp, to the replacement or repair of the defective or non-compliant product or the reimbursement of the price for the purchase of another product. Dura Lamp shall be granted a reasonable amount of time to repair or replace the product, or to make the previously authorized reimbursement. Any defective or non-compliant Products shall become the property of Dura Lamp as soon as they have been replaced or reimbursed.

10.2 The guarantee shall exclude any failures due to circumstances beyond the control of Dura Lamp (lightning, flooding, etc.), as well as any damage caused by the improper use of the Products and/or relevant accessories. Notwithstanding the above, Dura Lamp shall not be bound by the guarantee if the contested defects or non-compliances have occurred as a result of submitting the Products to resistance or environmental tests, the incorrect use of the same, or in the event that the use of or conditions of use of the Products is different from that indicated in the instructions and technical information, as a result of negligence, incorrect installation or accident, or if they derive from improper repairs, alterations, modifications, storage or transportation or by incorrect handling.

10.3 The Purchaser shall send the Products returned in accordance with the terms of the guarantee to the place indicated by Dura Lamp in compliance with the Dura Lamp policy regarding authorization to return materials in force at the time. In the event that the Products returned are found to be compliant or not faulty, the Purchaser shall pay the cost of returning the same as well as the cost of insuring, inspecting and handling the Products.

10.4 LED products Enjoy specific guarantees: details are published on www.duralamp.com

11. Limitation of Liability

11.1 With the sole exclusion of criminal intent and gross negligence, Dura Lamp shall not be liable for loss of profits or savings, loss of reputation or goodwill, any direct, indirect, consequential or special damage that may derive from or be connected to the contract or sale of products or services by Dura Lamp or by the use of the same of a contractual or extra-contractual nature or deriving from any other source, even where Dura Lamp has been notified of or is aware of the possibility of such damage.

11.2 The limitations and exclusions stated in article 11 shall apply within the limits permitted by law.

12. Applicable law and place of jurisdiction

12.1 These Conditions and all the effects of the same shall be governed by Italian law. The Parties hereby agree that any disputes related to these Conditions shall refer to Italian jurisdiction to the exclusion of all others.

12.2 The exclusive place of jurisdiction shall be the registered offices of Dura Lamp Srl, with the express exclusion of any other competing places of jurisdiction.
